

Jaclyn Naomi Barrera

Software Engineer - Frontend & Design Systems

Los Angeles, CA | 914-575-9631 | naomi44barrera@gmail.com | [linkedin.com/in/jaclynbarrera](https://www.linkedin.com/in/jaclynbarrera)

SUMMARY

Software engineer with 4+ years building production-grade design systems and accessible React component libraries at enterprise scale. Shipped a reusable component library for the U.S. Department of Veterans Affairs adopted across multiple engineering teams - with deep focus on accessibility, design token systems, Storybook documentation, and cross-team enablement. Operates at the intersection of design and engineering: translating specs into production-ready components while driving adoption across engineering organizations.

PROFESSIONAL EXPERIENCE

Thoughtworks

New York, New York

Software Developer - Client: U.S. Department of Veterans Affairs – **Design System Team**

Mar 2023 - Sep 2023

- Built and maintained a production React component library for the U.S. Department of Veterans Affairs - delivering accessible, reusable UI components adopted across multiple engineering teams and application domains.
- Implemented design token systems and responsive component patterns using React, TypeScript, and SASS - ensuring a consistent visual language and scalable theming architecture across the platform.
- Documented components in Storybook, authoring usage examples and implementation guides that accelerated adoption and reduced integration friction for consuming engineering teams.
- Introduced an automated accessibility linter and build-time scanning toolchain - shifting WCAG compliance from manual audits to automated enforcement across the entire codebase.
- Partnered directly with System Designers and Product Design leadership to translate design specifications into production-ready components, operating at the intersection of design and engineering.

Thoughtworks

Los Angeles, California

Software Developer - Client: U.S. Department of Veterans Affairs – **Developer Experience Team**

Sep 2023 - Sep 2025

- Core engineer from inception on a greenfield internal developer platform - built from prototype to production enabling VA engineering teams to self-serve test account provisioning across 6+ integrated systems, eliminating days of manual setup per team.
- Led React + TypeScript frontend migration from a Rails monolith to a modern component architecture with Tailwind CSS - improving performance, developer velocity, and establishing scalable UI patterns across the platform.
- Established automated testing infrastructure using Jest, React Testing Library, RSpec, and GitHub Actions - building quality gates that reduced regression incidents across the platform.
- Drove platform adoption across multiple engineering organizations through technical demos, onboarding sessions, and documentation - enabling teams to self-serve with confidence.

Thoughtworks

New York, New York

Software Developer - Client: U.S. Coalition on Sustainability

Jan 2022 - Feb 2023

- Built full-stack features in React, TypeScript, Redux, and PostgreSQL for a production sustainability networking platform serving 2,000+ active users.
- Championed accessibility standards end-to-end - led internal workshops on WCAG tooling and standards, embedding accessibility into team's development culture day to day.
- Practiced pair programming and TDD with Jest, React Testing Library, Cypress; delivered monthly feature demos to client stakeholders and incorporated feedback into sprint iterations.

SKILLS

Component & UI Development: React, TypeScript, JavaScript, Next.js, Redux, Tailwind CSS, SASS, CSS3, HTML5, Responsive Design

Design Systems: Storybook, Design Token Systems, Component Libraries, Accessibility (WCAG), Cross-team adoption & enablement, Figma

Testing: Cypress, Jest, React Testing Library, TDD, GitHub Actions, CircleCI

Backend & Data: Node.js, Ruby on Rails, REST APIs, GraphQL, PostgreSQL, SQL

Languages: Java, Kotlin, Ruby

Practices: Agile, AI-assisted development, Technical documentation, Cross-functional collaboration, Stakeholder enablement

EDUCATION

Flatiron School	New York, NY
Software Engineering Bootcamp - JavaScript, React, Redux, Ruby on Rails	
Manhattan College	Bronx, NY
B.A. Political Science & Communications
